3

\*The parts of this constructor are made from recycled wood.

# Option 01. Eco friendly constructor with VR technology

## Version 01 of configuration

We have 3 types of basic figures:

- cube
- prism
- some scraping

This basic pack made from recycled carton.

The second part of the configuration is a set of special stickers.

Themes of the sets can be :

- Holidays
- Animals
- Architecture
- Various characters, etc

This sets of stickers will provide VR connectivity, because of especial qr-code on

\*VR glasses are included in the base kit

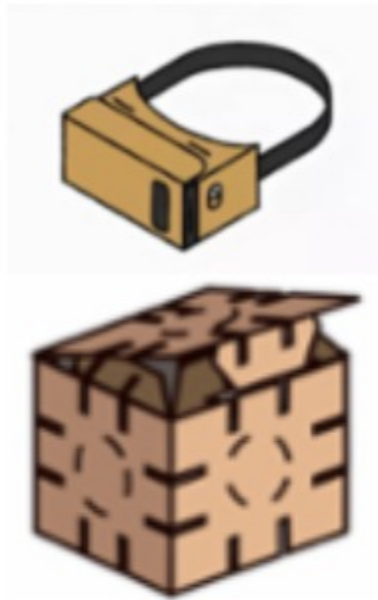

Try it now!

# Option 01. Eco friendly constructor with VR technology

## Version 02 of configuration

The first part of kit are basic figures and VR glasses again.

The second one is a book of stickers. On one side maybe some information of object, qr-code of VR model and on the other side sticker pack
