# ECO-friendly constructor with VR technology

**01**

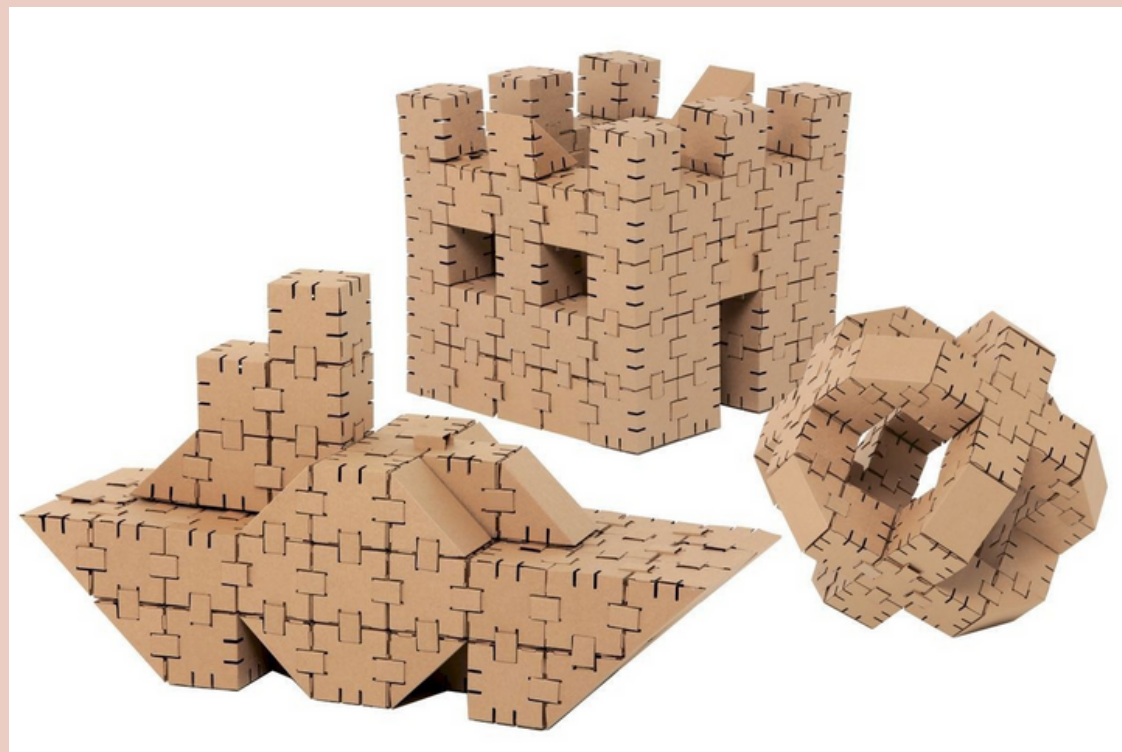

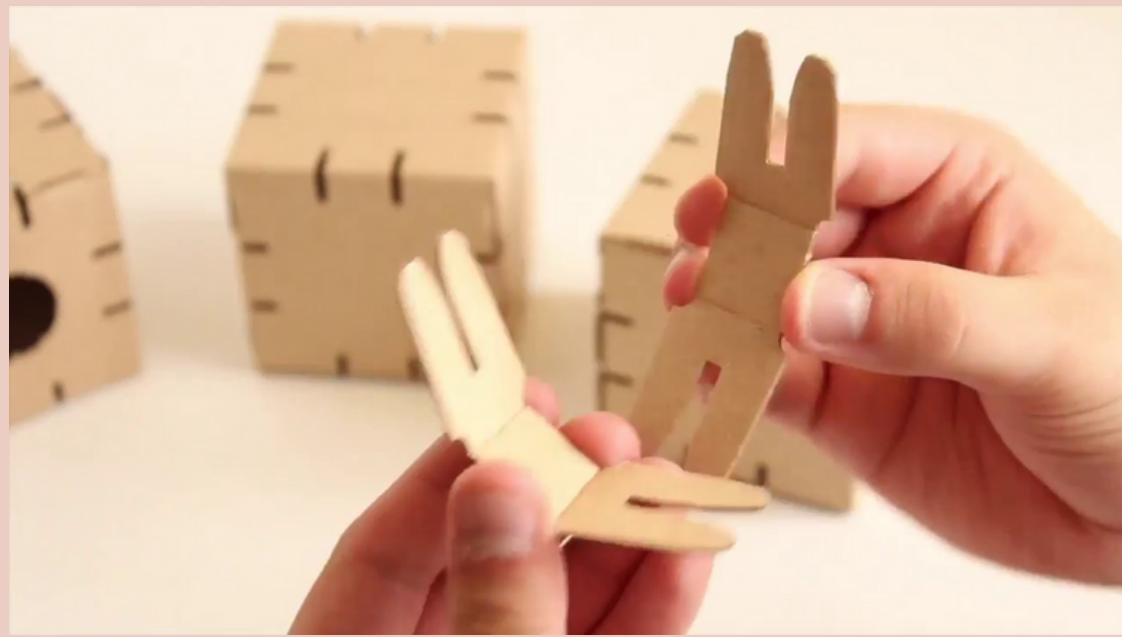

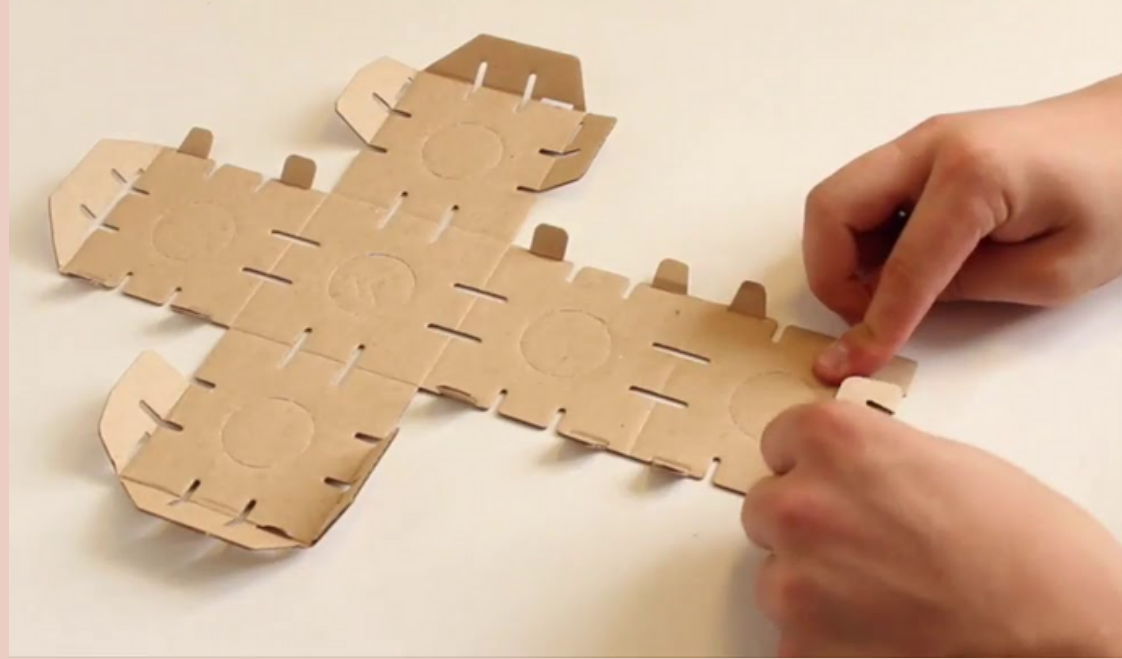

**Basic figures**

**02**

**Sticker catalog**

**03**

**VR glasses**

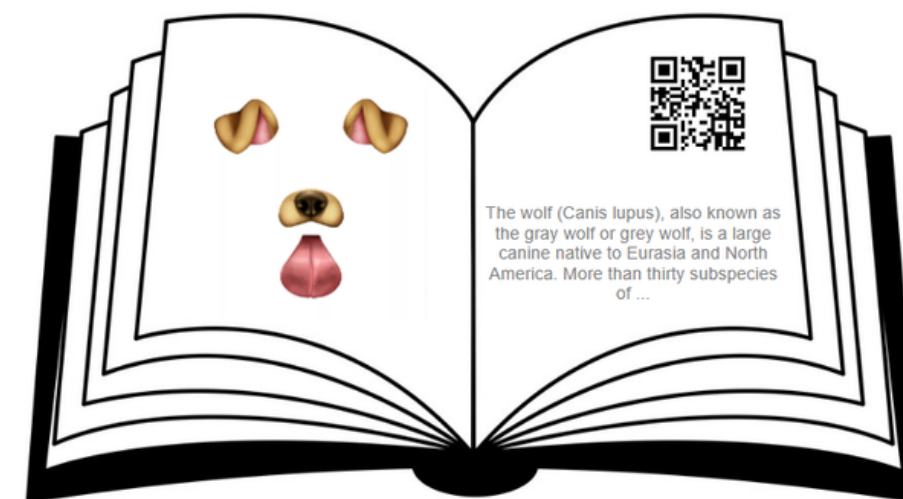

# Basic figures

**A set of flat patterns for collecting basic constructor shapes (cube, prism). With their help, the figure of an object or creature is created.**

# Sticker catalog

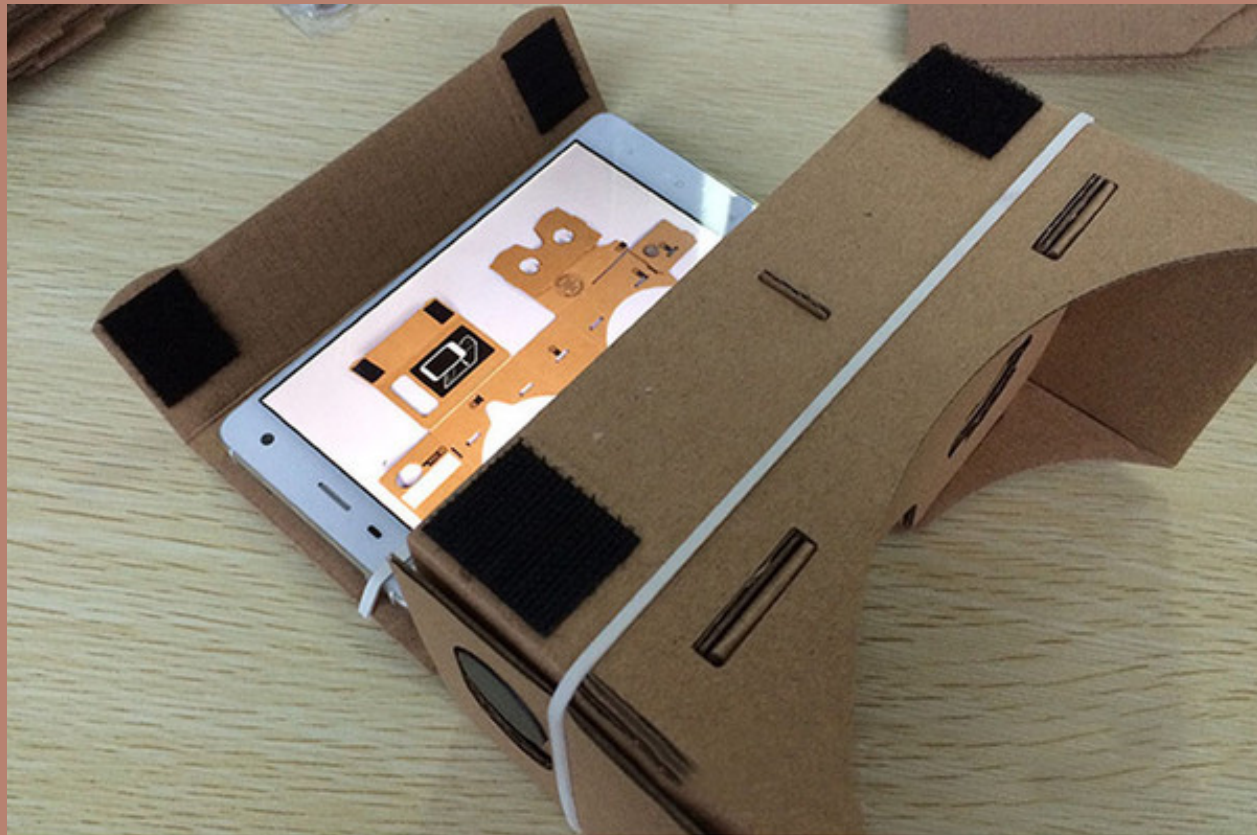

Catalog with stickers. Several thematic catalogs are offered (animals, plants, cartoon characters, etc.). Let's take a catalog with animals as an example. The pages contain stickers with stickers of animals, which are glued to the figure from the constructor. They will give a more realistic look to the figure. There is also a description of the animal, interesting facts and a QR-code required to obtain an image in the virtual space.

# VR glasses

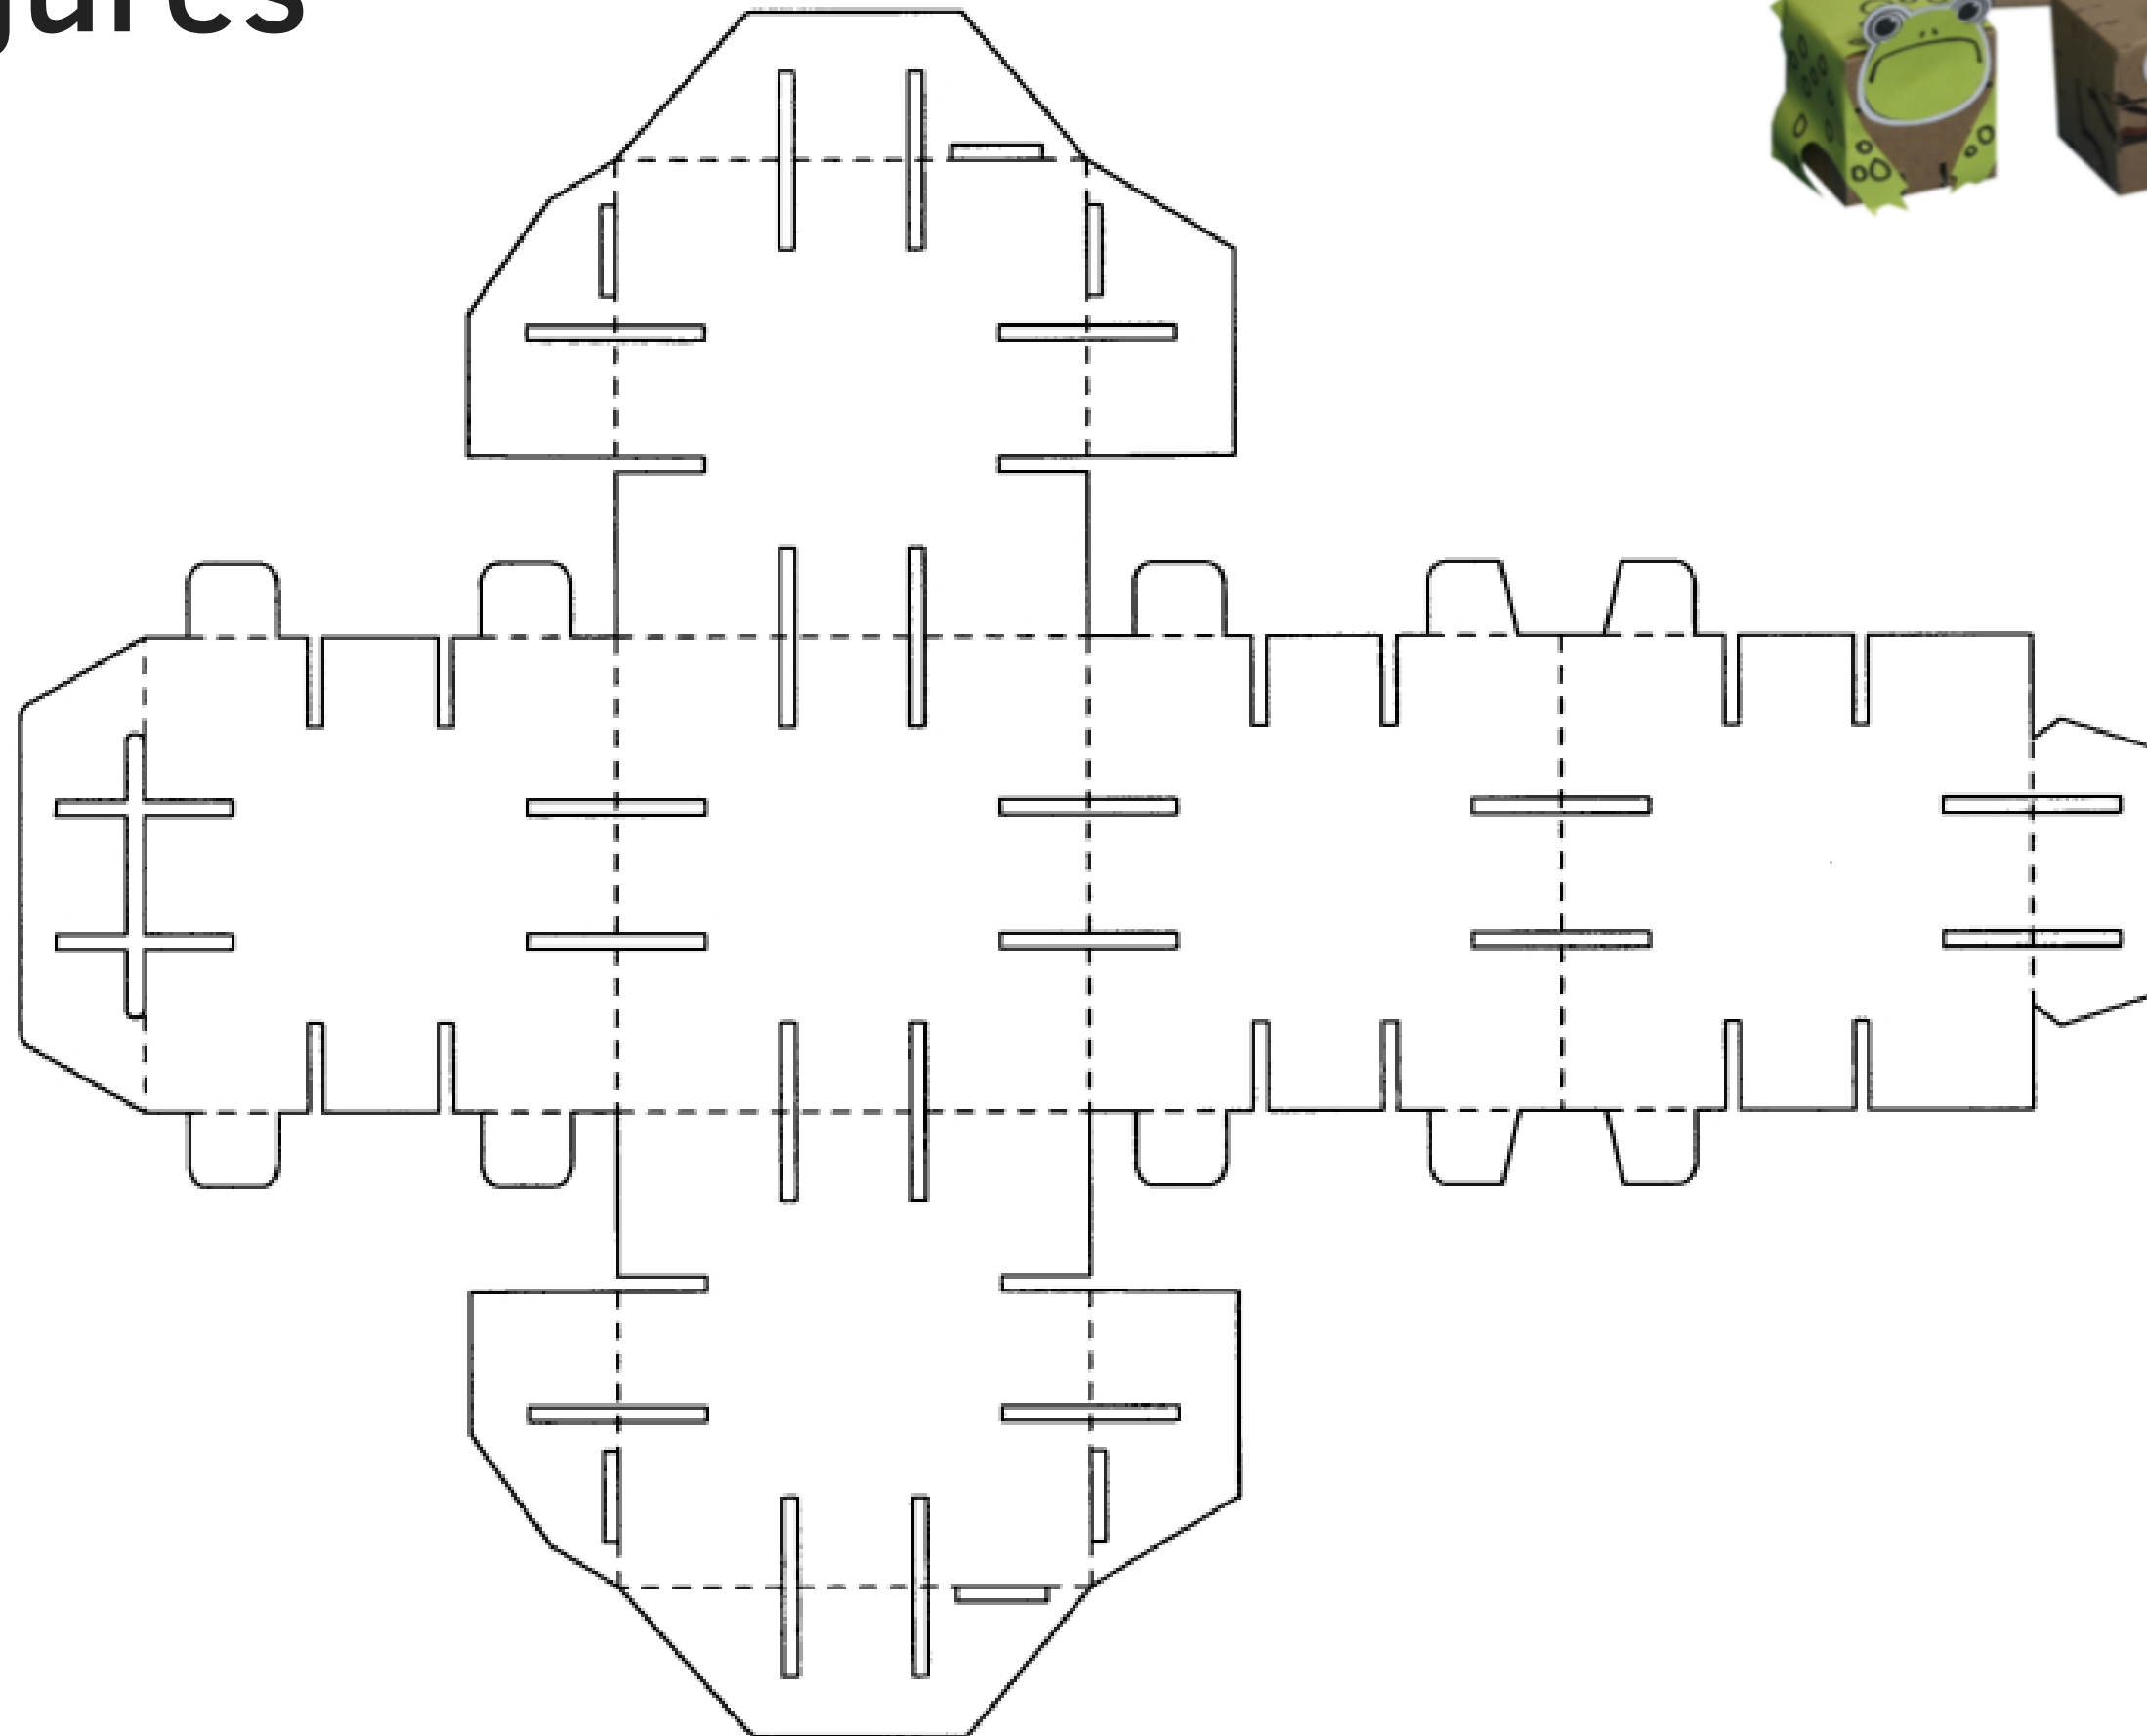

**The kit includes a diagram for assembling VR glasses. We point the phone at the QR-code to get information and insert the phone into the glasses. Enjoy the image.**
