# Team 9 design concepts

Summary :

Summary and expectation: Grandma is an old man who has no worries about food and clothing. What she pursues is more abundance in her spiritual life. And we gave her this album to help her remember the beautiful things in her life. However, the photos of these beautiful memories are easy to lose or be stolen. Grandma may need a better way to save these precious photos. We hope to get a design about the album.

Luster Paper is recommended for traditional photo albums to showcase every memory. It has a soft reflective sheen and subtle texture.
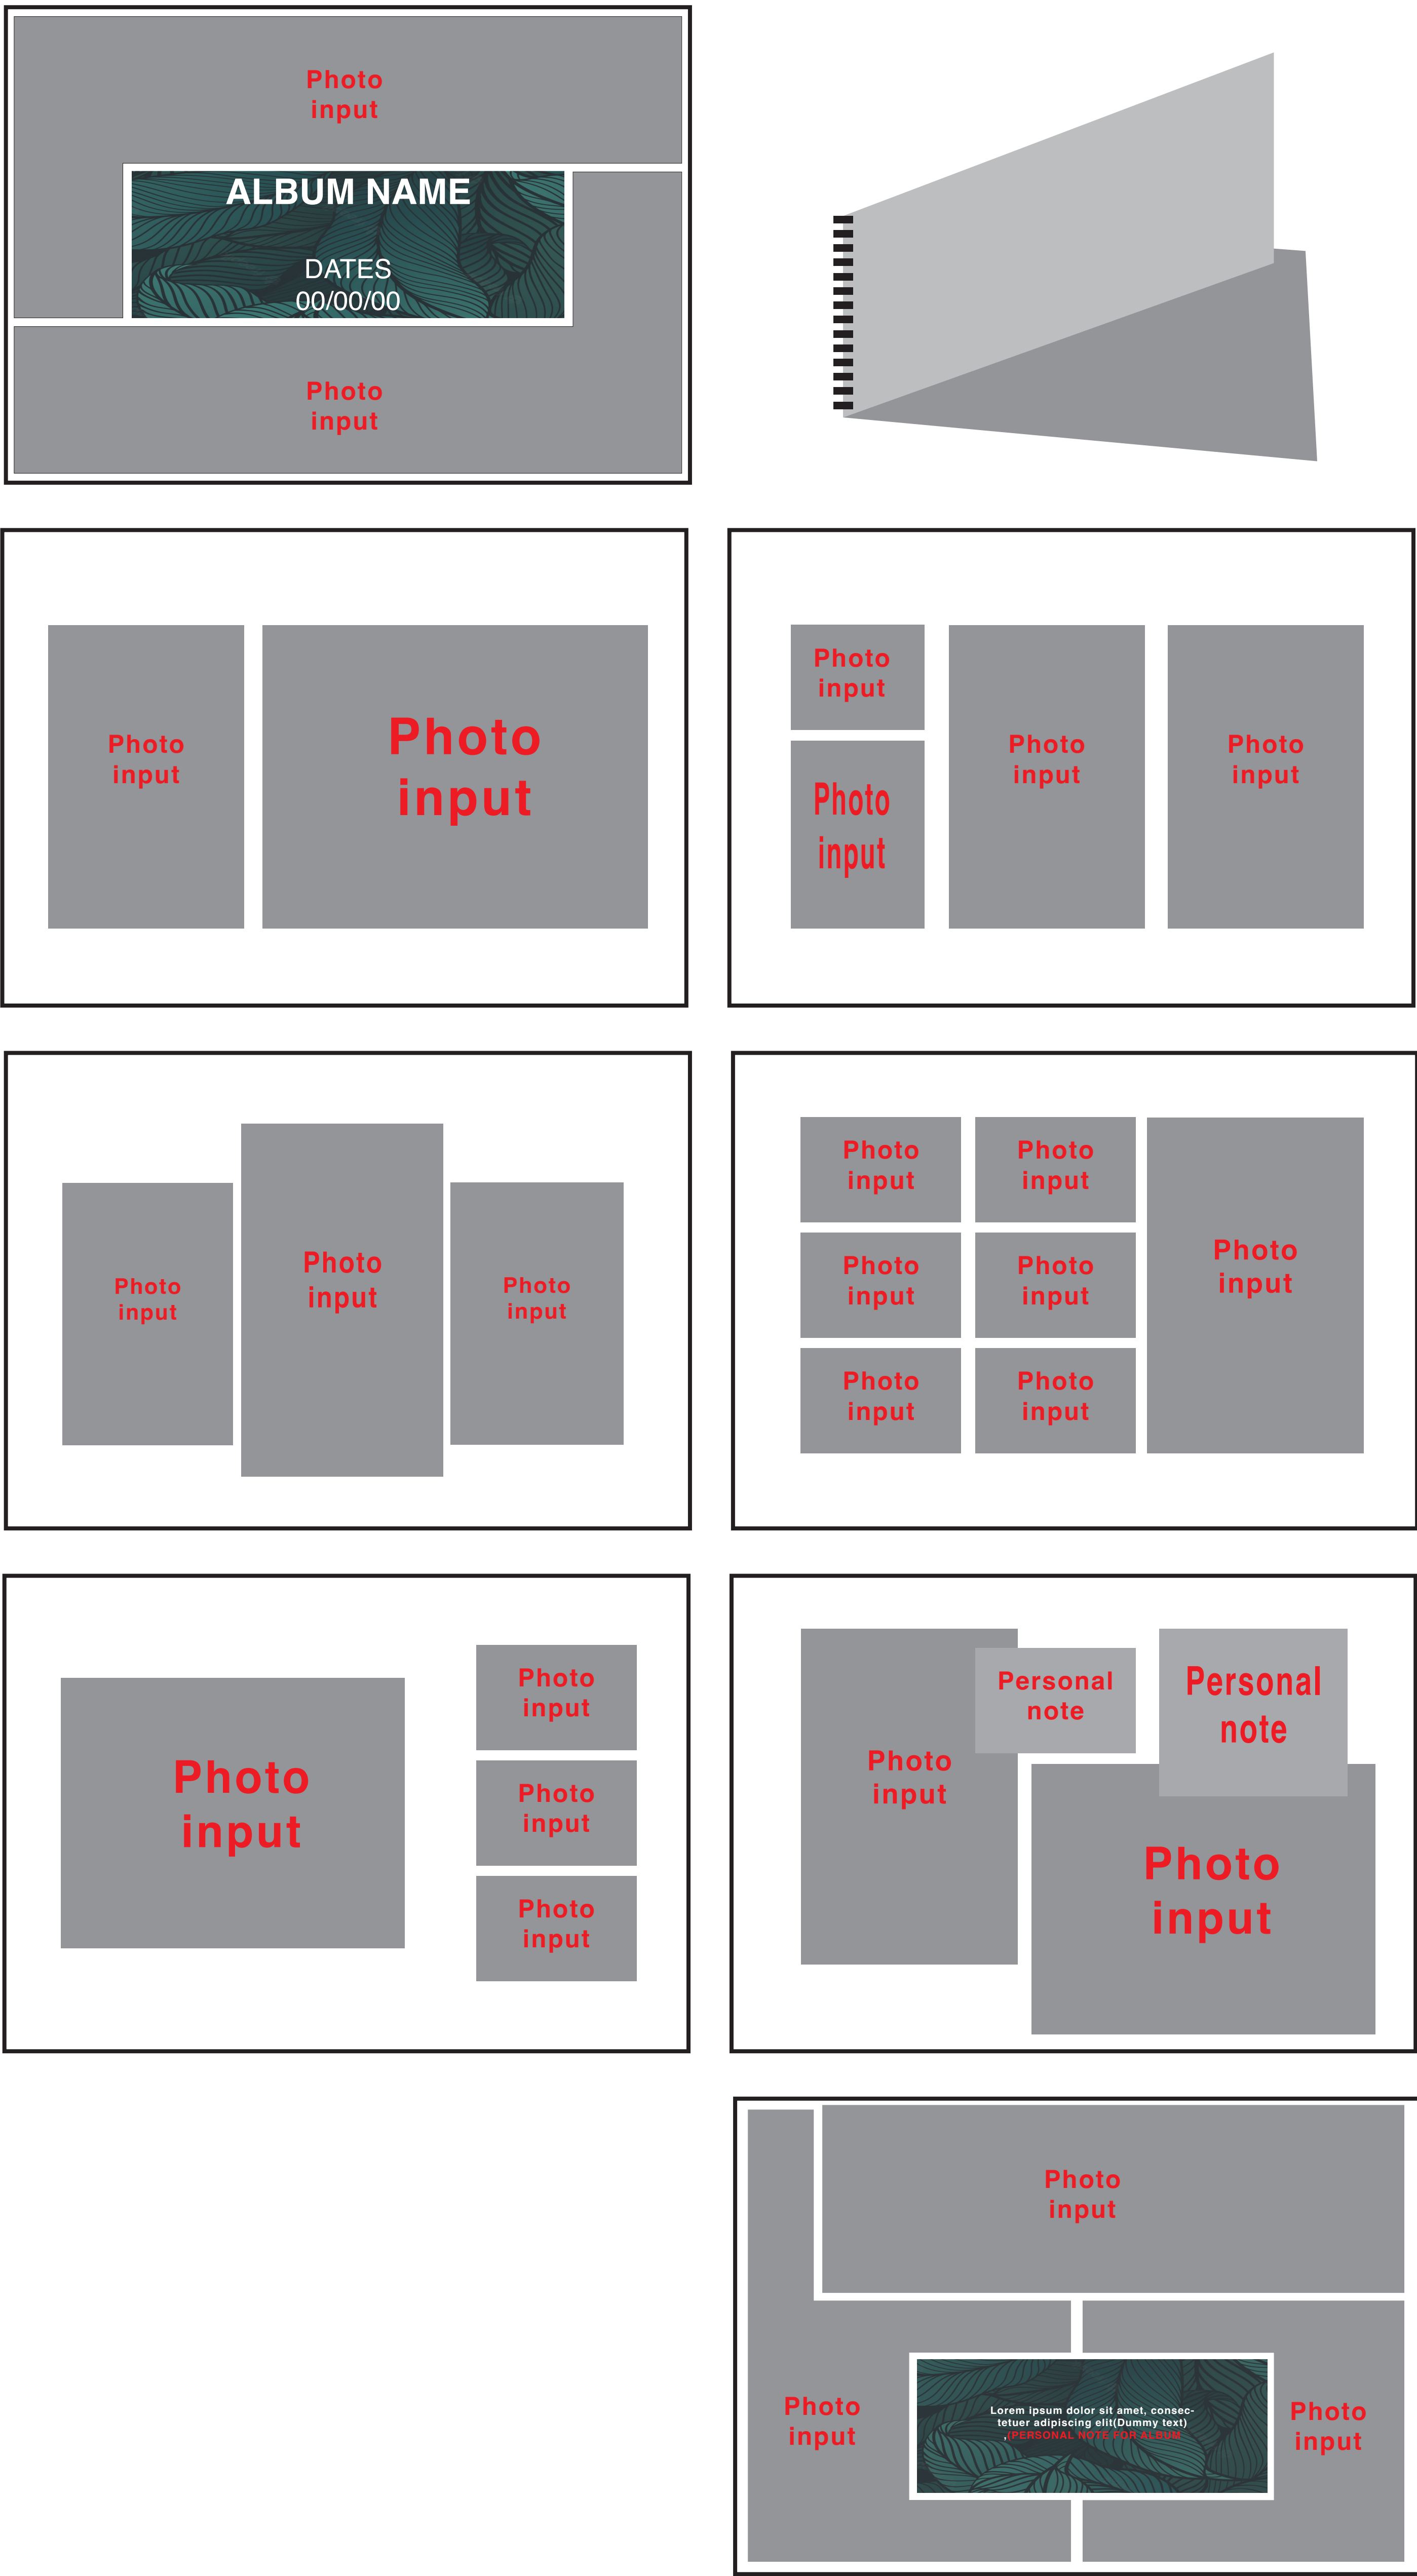

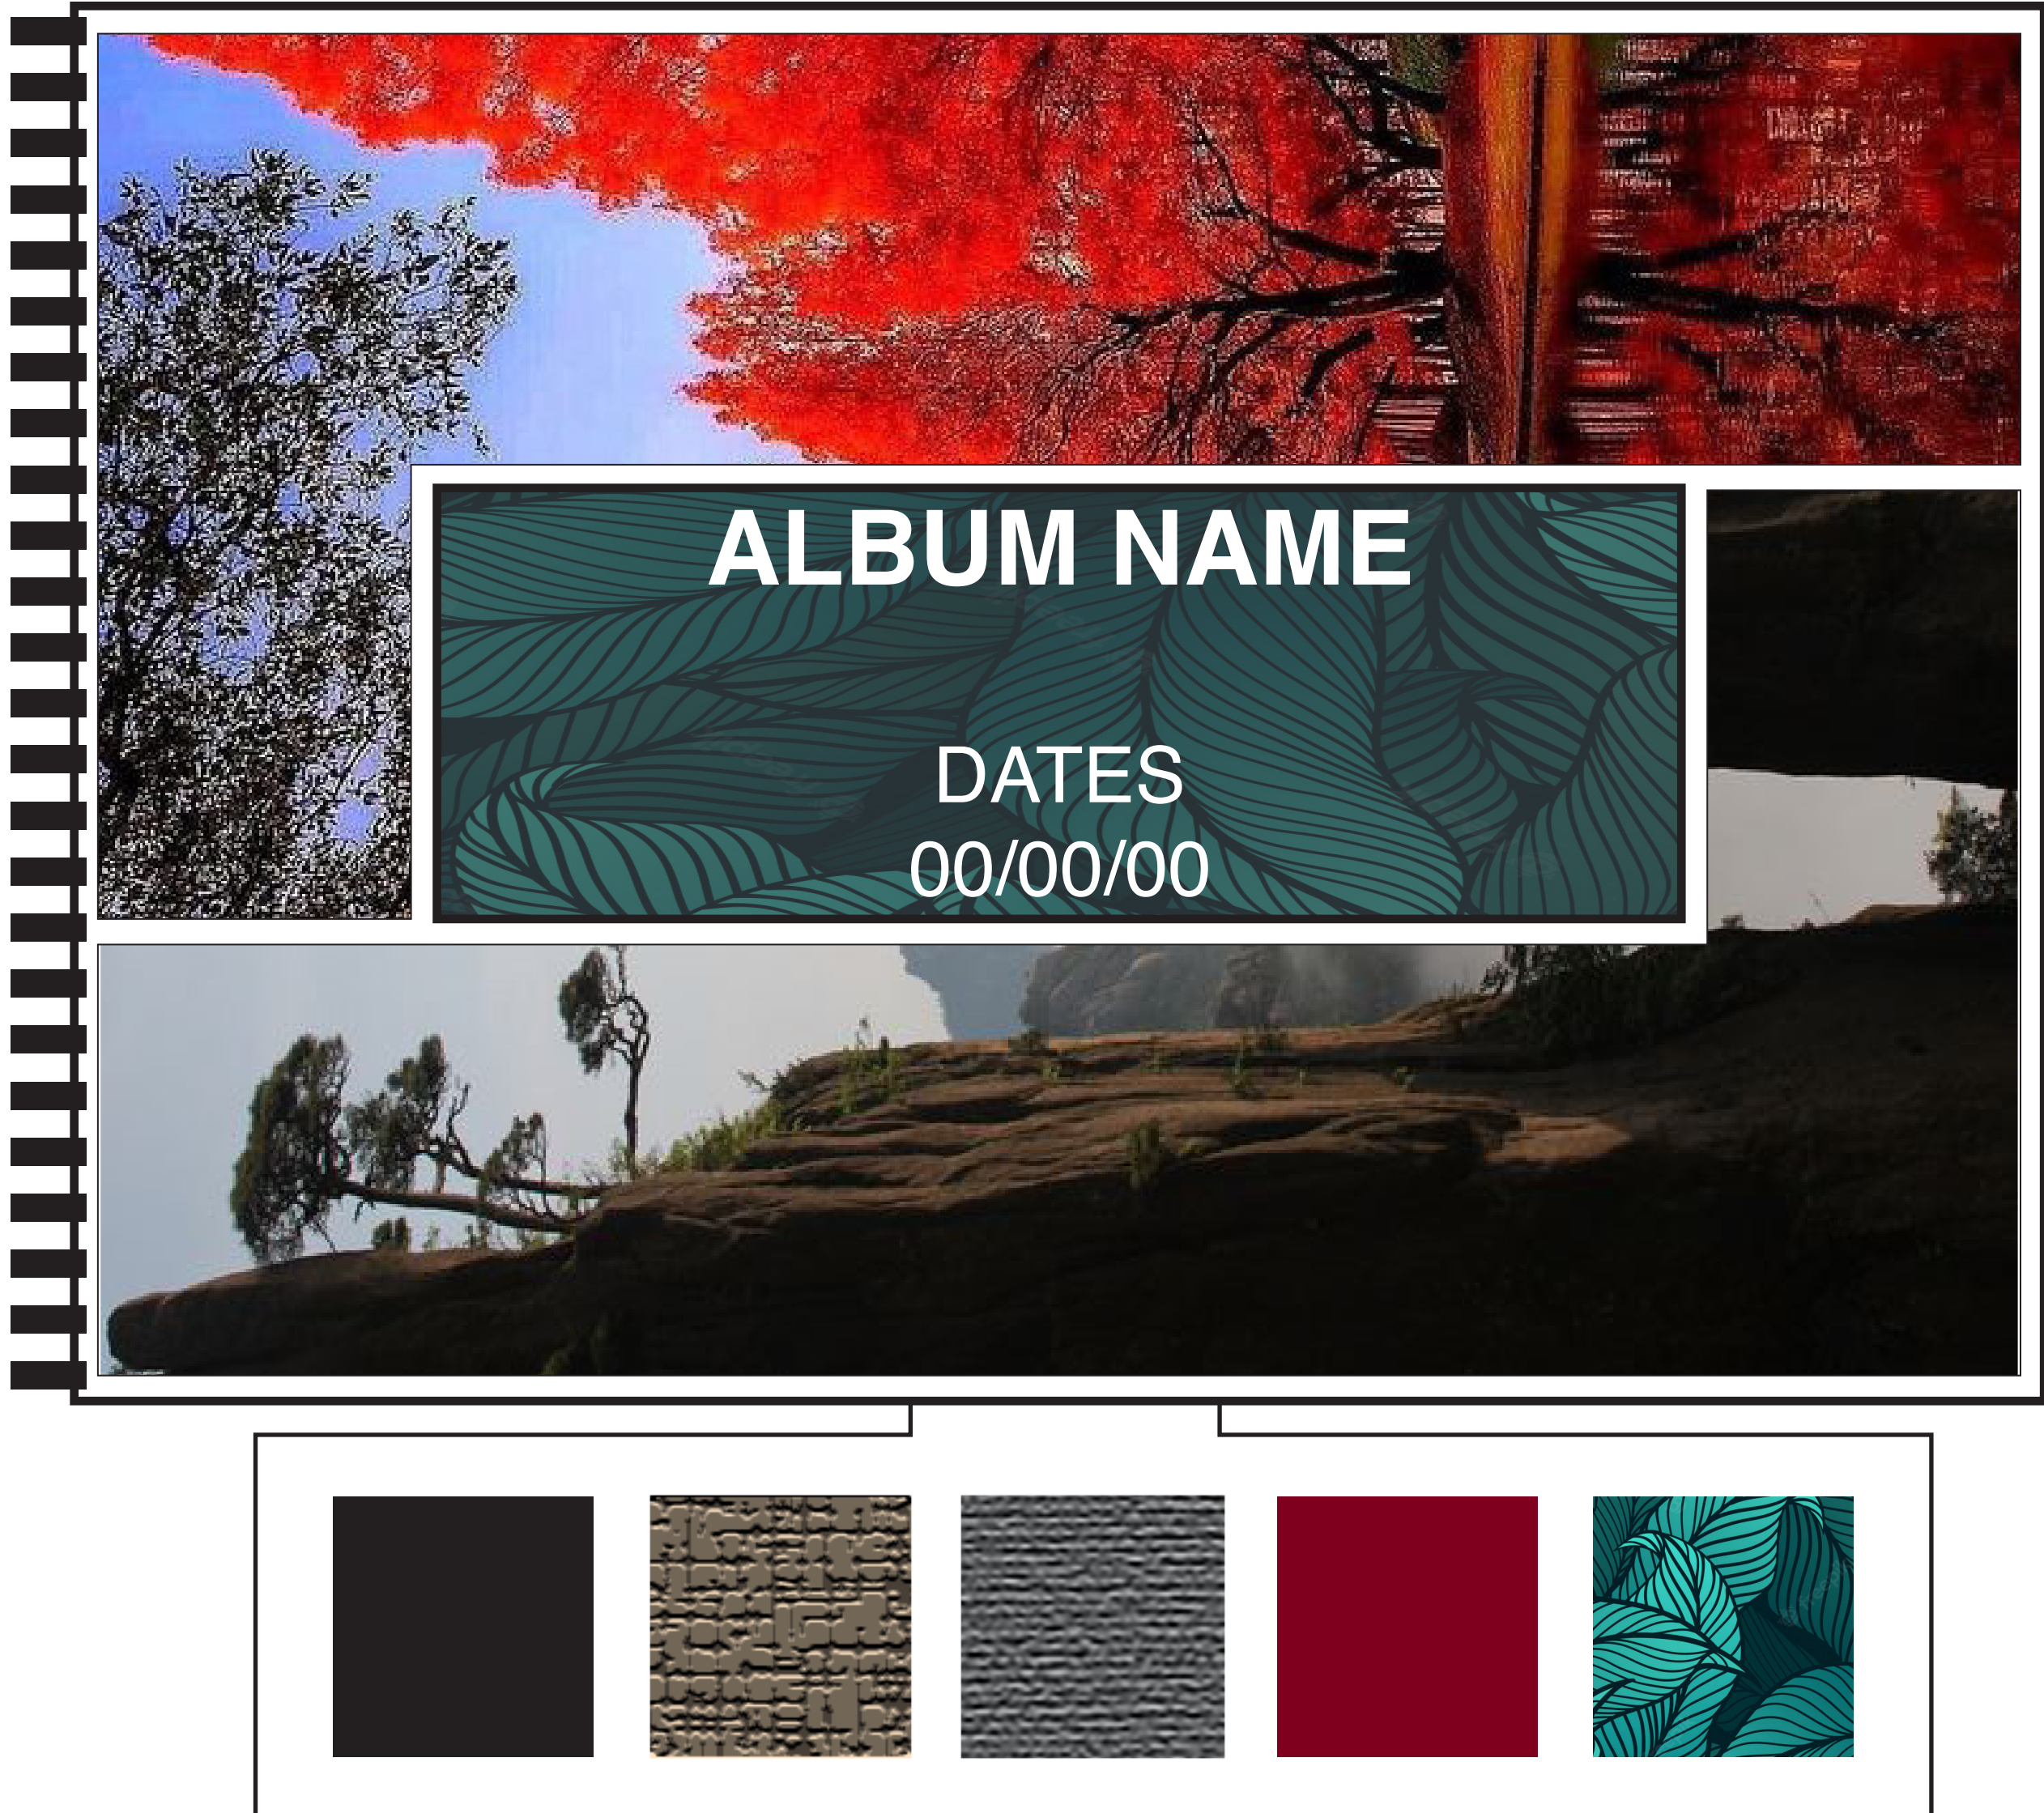

Laminating pages

Furthermore laminating the pages with the photos can help protect the page and images from outside elements also can properly secured them inside the album.
