# THE ETERNAL DIFFUSOR KIT

Innovative ritual diffuser. It combines traditional symbolism and modern technology, inspired by the ritual of honouring ancestors. It transforms fire and smoke into light and scented mist, offering a safe, elegant and multi-sensory experience. The mist, illuminated by LEDs (red and yellow), resembles a flame; when the sheets are inserted into the drawer, a sensor intensifies the light, simulating their combustion.

## Components

- **Removable drawer:** contains water and essence; can be opened to insert sheets of paper during use.
- **Functional Gold Sheets:** water-soluble gold films that dissolve to release essential oils, symbolising the transformation of burnt paper money.
- **Heating element:** nickel-chromium heating element that heats the water using electricity.
- **Ritual essence:** blend of natural essential oils for a sacred and meditative olfactory experience.
- **Accessories:** water measuring cup, tweezers for the sheets and illustrated manual with a guide to the ritual and symbolic meanings.

# THE ETERNAL DIFFUSOR KIT

## Materials

- Diffuser body: Anodised aluminium and natural bamboo
- Gold foil: Biodegradable water-soluble gold or silver sheets
- Packaging: Eco-friendly cardboard and natural fibre inserts
- Removable drawer: Transparent plastic
- Drawer sensor: Magnetic sensor.

## Advantages

- Symbolic: preserves the ritual gesture of offering, transforming it into an act of modern spiritual connection.
- Multisensory: engages sight, smell and touch in a complete meditative experience.
- Aesthetic: elegant and natural design, also suitable as a decorative object, while respecting tradition.
- Renewable: gold leaf and essences can be purchased separately to continue the ritual over time.

## TECHNICAL CHARACTERISTICS

- Dimensions: 25 × 15 × 15 cm
- Materials: Anodized aluminum, bamboo, clear plastic
- Power supply: DC 24V
- Consumption: 12–18 W
- Fog technology: controlled heat vaporization
- Lighting: Variable intensity red and yellow LEDs
- Sensors: magnetic (drawer), thermal (safety)

## INSTRUCTION MANUAL

### Installation

1. Place the diffuser on a stable surface away from the edge.
2. Insert the power supply connector into the DC socket on the back of the diffuser.
3. Pull out the front drawer.

### Filling

1. Pour water into the compartment using the measuring cup.
2. Add 3–5 drops of Ritual Essence.
3. If desired, insert 1 Functional Gold Sheet: as it melts, it will release oils and intensify the light.
4. Reinsert the drawer until the magnetic sensor clicks into place.

**Turn it on** using the Flame effect LED lighting button.

**Note:** the drawer sensor automatically intensifies the light when it detects Gold Sheets.

# PRODUCT BUDGET

300-400 yuan
